The Great Migration

December 2 - January 13

A group exhibition shows a series of artworks with animals as the theme. Various art mediums are showcased in this exhibition ranging from Chinese ink painting to etching and sculpture. "As the world's pollution levels rise by the day, the threat of extinction to many species of animal becomes an increasingly urgent issue. In using an animal theme for this exhibition Mob Art hopes to bring the tragedy of this disappearing world to the forefront of our consciousness."
